## What is Roloc<sup>™</sup>?

### The benefits of the Roloc<sup>™</sup> attachment

3M<sup>™</sup> Roloc<sup>™</sup> Abrasive Discs are smaller discs that quickly attach onto a Roloc<sup>™</sup> disc pad so that you can conveniently and rapidly change discs as needed. Our system provides a secure attachment even for heavy-duty applications. Each disc is also color-coded to identify its grade, making it easy to select the grade required for different applications.

► Remote applications

Corner or curved surfaces

Retain extra control

- ► Intricate, difficult to reach areas
- Localized, refining, finishing
- Remove weld splatter on small areas

### 3M<sup>™</sup> Roloc<sup>™</sup> Quick Release System

- 3M<sup>™</sup> Roloc<sup>™</sup> discs are designed for use on the face of the disc
- Available in a range of products for grinding, finishing, deburring and cleaning applications
- The 3M<sup>™</sup> Roloc<sup>™</sup> Back-Up Pad assures secure fixing with rapid grade or product change
- ► Can be used with 3M<sup>™</sup> Roloc<sup>™</sup> Rubber Back-Up Pad

### 3M<sup>™</sup> Roloc<sup>™</sup>+ Quick Release System

- 3M<sup>™</sup> Roloc<sup>™</sup>+ discs/brushes are designed for use on the edge and have a longer shaft for extra strength
- Available in a range of products for finishing, deburring and cleaning applications
- The 3M<sup>™</sup> Roloc<sup>™</sup> plastic holder assures secure fixing with rapid grade or product change
- To be used with all 3M<sup>™</sup> Roloc<sup>™</sup>+ plastic holders (excluding3M<sup>™</sup> Roloc<sup>™</sup> rubber back-up pads)

## Meet the

of right angle abrasives for unparalleled power and performance!

Featuring 3M<sup>™</sup> Cubitron<sup>™</sup> II Abrasives for an unbeatable combination of speed and long life, and Scotch-Brite<sup>™</sup> Abrasives for ease of use and consistent quality finishes.

## Introducing the

of right angle abrasives **for value-priced performance!** 

The next-best thing to our Premium Series of 3M<sup>™</sup> Cubitron<sup>™</sup> II Abrasives, our new Advanced Series harnesses the power of 3M<sup>™</sup> Precision-Shaped Ceramic Grain and helps minimize your abrasive spend.

What is Roloc?

(7)

## **Technology:**

# 

3M<sup>™</sup> Cubitron<sup>™</sup> II Abrasives are revolutionizing the cutting and grinding process. They're faster-cutting and longer-lasting than conventional abrasives.

The secret lies in the revolutionary 3M<sup>™</sup> Precision-Shaped Ceramic Grain technology. As the triangular-shaped grain wears, it continuously fractures to form sharp peaks that slice through metal – providing a cooler, faster and longer lasting cut.

## **Technology:**

# Scotch-Brite<sup>™</sup>

### The perfect finish starts with Scotch-Brite<sup>™</sup>

There's one family of abrasives that's trusted to deliver repeatable results and fine finishes, and it's Scotch-Brite. With roots in the past and an eye on the future, Scotch-Brite<sup>™</sup> Industrial Abrasives are dedicated to uncompromising quality – just like you.

### Scotch-Brite Non-Woven technology explained

Our unique non-woven web is the secret to superior performance. It binds together synthetic fibers and abrasive particles to create a conformable, three-dimensional material. Its open structure reduces the risk of warping or discoloring the part, resists loading, improves finish and prolongs the product's life.

### What makes Scotch-Brite the best you can buy?

- A tough, non-woven nylon web impregnated with resin and mineral throughout its structure
- Spring-like action produces a smooth, burr-free surface
- Uniform, consistent results with no undercutting
- Suitable for deburring, finishing, cleaning and small weld removal applications
- Easy to use, less rework, fewer rejects

## Application guide
