

SCOTCH-BRITE™ BRISTLE DISCS AND BRUSHES

CONSISTENT PERFORMANCE.
CONFORMABILITY. SAFETY.

[3M.ca/Metalworking](https://www.3M.ca/Metalworking)

WHY CHOOSE SCOTCH-BRITE™ BRISTLE PRODUCTS

Scotch-Brite™ Bristle products contain 3M's patented long-lasting Cubitron™ Ceramic Abrasive Grain, which provide a fast, more uniform finish. This means that as the disc wears, fresh mineral is always exposed, delivering improved productivity and value.

ATTACKS TOUGH APPLICATIONS – NOT YOU!

- ✓ **Safe** – Easy to use. No flying wires or fibres.

- ✓ **Conformable** – Very conformable, less manipulation for operator on parts.

- ✓ **Long Life** – Patented 3M™ Cubitron™ Abrasive Grain filled bristles apply a continuous fresh supply of mineral for consistent finish and long-lasting quality throughout the life of the product.

- ✓ **Non-Loading** – Bristles do not load up with debris, rubber or plastic residues from metal surfaces, and won't cause cross contamination.

- ✓ **Cool Running** – Resists heat build-up to help reduce potential for tempering or damaging the work surface. Doesn't cause distortion to the part.

- ✓ **Easy to Use** – Brushes are balanced, run smoothly and do not require dressing.

► Tech Tips

- ✓ Do not use excessive downward pressure on the tool – let the tool and bristle tips do the work.
- ✓ Bristle discs perform the best when slightly angled (2-4 degrees).
- ✓ Do not work bristle over sharp edges. When finishing edges on a flat surface, position the tool so that the bristles run off the edge and not into the edge.
- ✓ Do not dwell on a localized area to avoid excessive heat build up.
- ✓ When using the Type A and C bristle products, the bristles are directional.

APPLICATIONS

Deburring

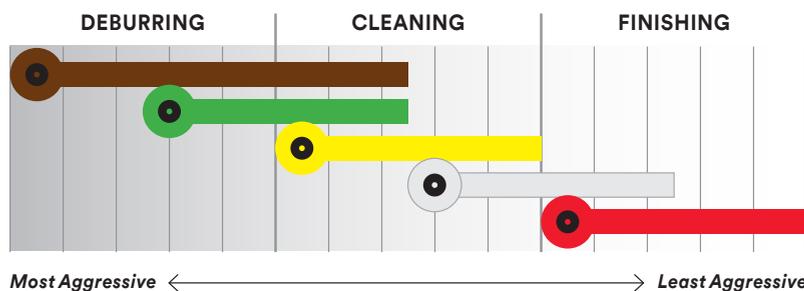

Use on metal and plastic.

Cleaning

Clean welds, remove corrosion, paint and rust without removing base material.

Finishing

Achieve various grains including satin finishes for softer metals, can replace chemicals and compounds.

ADVANTAGES OF SCOTCH-BRITE™ BRISTLE OVER COMPETITION

	Scotch-Brite™ Radial Bristle Products	Wire Brushes	Non-Woven Abrasive Discs
Conformability	Very conformable, less manipulation for operator on parts.	Little conformability, lots of pressure necessary.	Conformable.
Life	Longer-lasting quality throughout life of product.	Long-lasting but loses shape quickly.	Short life.
Consistency	Uniformed cut that permits consistency.	Finish varies from part to part.	Consistent finish.
Safety/Cleanliness	Easy to use. Does not throw wires or fibres.	Throws high velocity, needle-like wires at the operator.	Used fibre debris may plug dust collectors, hard to clean up.
Performance	Good finish. Cubitron™ Abrasive Grain for cut performance. Comes in a wide range of grades.	Many times it does not remove targeted material.	Good finish, low cut performance, short life.

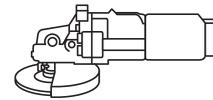

KNOW YOUR PRODUCTS

SCOTCH-BRITE™ BRISTLE DISCS

Brush-like bristle discs remove coarse coatings from large open areas of a work piece. Works on right angle tools quickly and easily with little or no pressure.

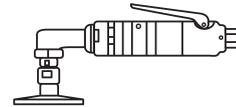

Product Tooling

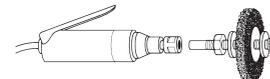

SCOTCH-BRITE™ ROLOC™ BRISTLE DISC

Fast-running discs with a standard 3M™ Roloc™ Attachment, efficiently clean or strip many substances from various surfaces without damaging the work piece. Quickly and easily achieve a quality and consistent finish with light pressure.

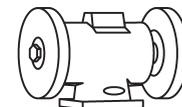

SCOTCH-BRITE™ RADIAL BRISTLE DISCS

Radial Bristle Discs create an incredibly uniform finish even around protrusions, detailed grooves, patterns and other hard-to-reach areas.

SCOTCH-BRITE™ RADIAL BRISTLE BRUSHES

Bristle Brushes can ensure the quality finish that you demand. Replace your wire wheel products with this great technology from 3M. These brushes are suited to many of your heavy-duty industrial applications. Use on bench motors.

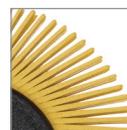

Straight

Type S – Rigid and very aggressive for cleaning and deburring, non-directional.

Angled

Type A – Rigid and very aggressive, similar to Type S but for smaller diameters, directional.

Curved

Type C – Less aggressive and more conformable, directional.
