

Laser Welding Machine Trolley WL-180 MOST

A practical and robust solution for the convenient and safe transport of welding equipment, including a technical gas cylinder.

The trolley allows for the stable positioning of a laser welder with a wire feeder or a standard welding power source with a wire feeder. Thanks to its robust construction and large shelves, it offers high versatility and compatibility with many models of equipment.

The castors ensure easy manoeuvring, and the two front castors are fitted with brakes to enhance safety and stability during operation.

Technical specifications	WL-180 MOST
Overall length	114 cm
Overall height	81 cm
Overall width	64 cm
Unladen weight	39 kg
Max. load capacity	180 kg
Top shelf dimensions	42 x 80 cm
Bottom shelf dimensions	44 x 80 cm
The distance between the top and bottom shelves	54 cm
Catalogue number	3L 04 020042

Accessories

Cylinder securing chain (1 pc.)

Safety straps (4 pcs.)
